EXECUTIVE SUMMARY

Highly organized Data Analyst with expertise in complex clinical datasets. Ensures scientific accuracy and delivers impactful insights aligned with customer needs. Proficient in SAS, SQL, and Excel to generate insights, identify data gaps, and recommend solutions collaboratively.

PROFESSIONAL EXPERIENCE

LAB DATA ANALYST   **February 2022 – Present**
IQVIA, Canada

- Demonstrated strong time and project management skills as the primary data analyst for 20+ regional and global studies, ensuring timely data transfers and addressing client queries throughout the study life cycle.
- Efficiently handled large clinical datasets in SAS, showcasing exceptional organizational skills, attention to detail, and delivering data-driven solutions for client reporting needs.
- Established and maintained strong internal and external customer relationships to help resolve issues and address queries effectively.
- Served as a subject matter expert (SME) and new hire trainer for ActiveBatch, providing comprehensive onboarding and ongoing support to ensure effective use of the software.
- Designed and implemented a SAS-based automation project for a database management system, driving process improvement by automating verification, reducing errors, and improving efficiency.

BIOCURATOR   **October 2019 - April 2021**
PierianDx, India

- Curated scientific insights on Oncology from various sources as clinical practice guidelines, drug labels, and research articles for clinical interpretation of sequencing data and IVD projects, while staying current with biomedical research and therapeutic trends.
- Automated tasks with Google Sheets macros, reducing team effort by over 100 hours/month and implementing process improvements.
- Functioned as a Language reviewer, supporting the team in attaining error-free and easy-to-understand clinical interpretations.
- Recognized for outstanding performance and teamwork, advanced from Junior Biocurator to Biocurator in just one year, exceeding expectations and contributing significantly to team success.

PROGRAMMER ANALYST TRAINEE   **January 2016 – July 2016**
Cognizant Technology Solutions, India

- Preparation and review of Test cases, gathering and analyzing the requirements based on project needs.
- Tested SQL Reports, COGNOS reports, Safety Reports, and data entry for all type of reports
